Specification	
Vinification	The plots are located on the lower slopes where the soil is rich and well-drained. The soils are predominantly silty, with limestone sub-soil. Each plot is harvested by a combination of machine and hand picking. The grapes are carefully pressed as soon as they reach the cellar. Once the juices have settled, they are slowly fermented at a 16/18°C, in concrete vats and in stainless steel tanks. The wine is aged on its fine lees for 7 months with regular stirring, enhancing structure, aromas and protecting the wine from oxidation.
